### Toyota's Georgetown Plant Begins 20th Year of Business in Kentucky

The 2007 Toyota Camry with TMMK Team Members

TMMK President Gary Convis at the 2007 Camry launch celebration

Former Kentucky Gov. Martha Layne Collins and Dr. Shoichiro Toyoda, honorary chairman, Toyota Motor Corporation

**T**OYOTA Motor Manufacturing, Kentucky, Inc. (TMMK) celebrates the launch of the all-new, sixth-generation Camry with team members, local community leaders, and company executives from the manufacturing and sales divisions.

TMMK is Toyota's largest manufacturing plant in North America. Last year the Georgetown plant produced 509,140 vehicles, including 356,428 Camrys. The Camry is built by more than 7,000 team members who work at the Georgetown plant and has been America's top-selling car in the United States for eight of the last nine years.

Georgetown was announced as the plant site in 1986, and the plant built its first Camry in 1988. Since then, TMMK has built more than 6.5 million vehicles.

Speakers at the line-off event included: Gov. Martha Layne Collins; Kenichiro Fuse, chief engineer – Toyota Motor Corporation; Jim Press, president – Toyota Motor Sales; Gary Convis, president – TMMK; Dr. Shoichiro Toyoda, honorary chairman – TMC; and Steve St. Angelo, executive vice president – TMMK.
